

Patterns and trends in UK higher education 2014

Annexe: Patterns of institutional diversity

This section illustrates some of the key student, staff and finance distributions across higher education institutions in the UK. The finance and staff charts cover the 160 institutions in receipt of funding from the funding councils, and in addition the University of Buckingham. Staff charts also include figures for the University of Wales (central functions). As the University of Wales (central functions) has staff but no students it is not included in institutional charts based on student data or finance ratios featuring student data.

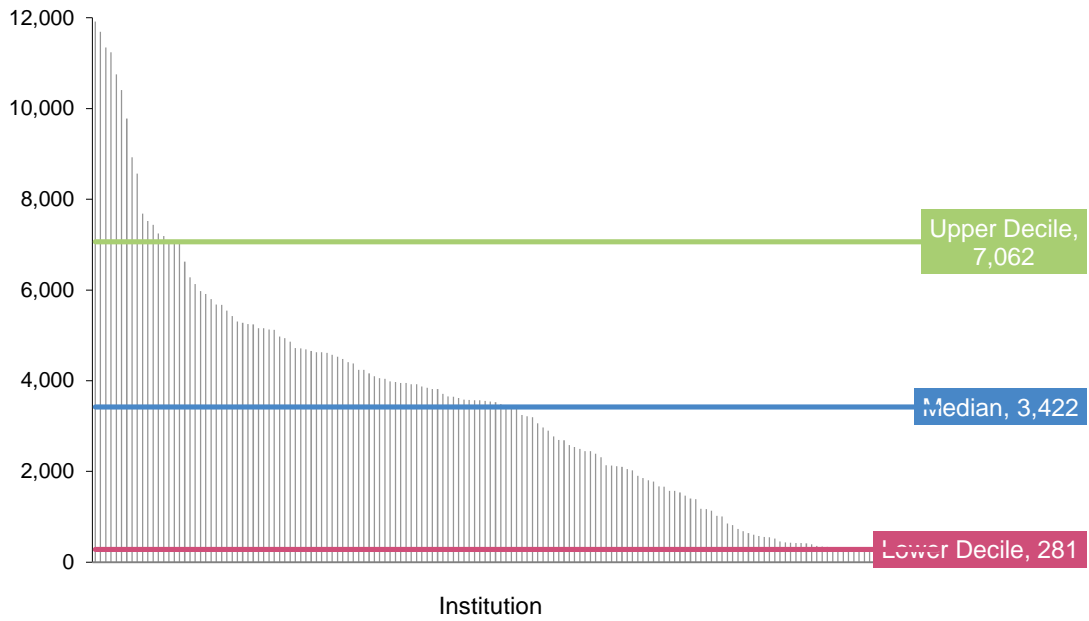

The data is from HESA, student, staff and finance returns for 2012–13, and the Performance Indicators for 2012–13. Charts 3, 29, 30 and 35 each have one outlier not represented on the chart; chart 37 has two outliers; chart 34 and 36 have three outliers. These values have been excluded to make the distribution as a whole more visible in chart form.

1. Percentage of postgraduate students by institution 2012–13
